SUMMER COMFORTS

Where They May Be Enjoyed by Those Who Desert Washington.

Points About Admirable Places—Delights in the Shady Country Side—by the Surf.

There is an old and rude story that apply illustrated the radical difference in the tastes of different persons. The recital relates that one night there was a meeting of church deacons over some vital question affecting the church. During the discussion one amiable old gentleman, seeking to allay growing acerbities, remarked that it was not natural for folks to have different notions of different things. "Now," he remarked, by way of illustration, "if every man around here had been of my way of thinking they'd all have wanted to marry my wife."

"Yep," ejaculated another deacon, "an' if they'd all been of my way of thinkin', none of 'em would have had her." It's the same way with everything else, and especially when it comes to selecting a place at which to spend the hot months of summer. Persons who have the sea shore dislike the mountains, and vice versa, but no matter in which direction preferences may lay a perusal of the notices given below will develop opportunities to suit them all, and their pocketbooks as well.

AN UNEXPECTED REWARD.

Sequel to an Interesting Story of Department Life.
Not long ago The Star told of the self-sacrifice of a clerk in the patent office, who, upon receiving her promotion, went to Commissioner Buttersworth and asked that the increased salary given her be transferred to a fellow-clerk, by whose side she worked, and whose necessities she regarded as much greater than her own.

Now it has turned out the broad cast upon the waters has returned with multiplied value. The beneficiary of that act was promoted from a "laborer" at \$200 to be an "assistant watchman" at \$720, but the lady whose self-sacrifice caused the promotion of her friend, has since been promoted to a position of honor, and as it happens she is better situated now than she would have been had she taken the larger salary offered to her in the first place, for the position she has received places her in line for a \$900 place at some future day, but the other did not allow of future promotion.

Presidential Nominations Confirmed.
The Senate yesterday confirmed the following nominations: Postmaster—Massachusetts, W. Gray, at Campello; Pennsylvania, E. R. Allen, at Columbus; Indiana, W. H. Conner, at Plymouth; Wisconsin, F. B. Kinney, at Barron; F. W. Kiefer, at Antigo; Minnesota, W. D. Ellsworth, at Evelev.

Washington, D. C. Grove of Virginia, to be an assistant surgeon in the navy.

Duke Abruzzi's Yacht Launched.
The eighty-five-ton cutter yacht Bona, built for the Duke of Abruzzi, nephew of the King of Italy, which is now in the United States at the head of an expedition which will make an attempt to ascend Mount St. Elias, was launched at Glasgow yesterday. She is modeled on the lines of the famous yacht "Thetis," which was the competitor against the American yacht "Thetis" in the America's cup. Captain Sykes, who formerly commanded the "Thetis," will be the sailing master of Bona.

Thousands of Cattle Released.
Senator Kyle has procured an order for the release of cattle held for redemption on Pine Ridge Indian reservation, which probably will apply to other reservations where similar conditions exist. During the storm of the late winter and spring cattle strayed from adjoining ranges to the reservation, and as many have demanded a dollar a head for their release, much to the disgust and annoyance of the cattle owners. Senator Kyle says the order will release many thousand cattle in the Dakotas, Montana, Wyoming and Idaho.

Landing the Foreign Mails.
The Postmaster General has awarded to the Starlin Transportation line of New York the contract for performing the newly instituted New York harbor mail service. This provides for a vessel to carry the mails from quarantine station on to the government pier, and thence to the Pennsylvania railroad depot at Jersey City and to a point adjacent to the Grand Central depot in New York City. The mails from New York are landed at the Battery pier, while landing at the other two points obviates the necessity for sending the outside mails through the New York office, and expedite them by many hours through direct train connections. The contract price is \$25,740 and the contract is to run four years.

May Be Admitted Free.
The Treasury Department has reconsidered its position on the question of the admission of duty on raw cotton feathers. The board of general appraisers at New York held that in their raw state they were not "suitable for military purposes" without the use of the law, and hence should be admitted free. The department, however, has decided to concede, and a telegram was sent today to the collector of customs at New York instructing him to dispense the appeal.

Patent to a Local Inventor.
A patent has been granted to Oliver D. Hays, of the District of Columbia, for a camp stove. The stove is a portable stove, and is designed to be used in a camp or in a house.
